# Chapter 21: Maintaining the Database (DRX-4C Only)

The database can be maintained by erasing a single memory location or the entire memory bank of stored NDC codes and average piece weights. To erase entries follow the steps below:

21. 1 Delete All

1. Press the menu key and select Count (CoUnt) by pressing the T key.

   MODE

    CoUnt

2. Select dAtA_b by pressing the T key.

    MODE

    dAtA_b

3. Select delete all (dEL ALL) by pressing the T key.

    MODE

    dEL ALL

4. Select yes (YES) by pressing the T key to continue with erasing all entries in the database.

    MODE

    YES

5. Done (*donE*) will be displayed to confirm the entire memory bank has been erased.

```
          MODE
        donE
```

21.2 Delete Single Entry

1. Press the menu key and select Count (*CoUnt*) by pressing the T key.

```
          MODE
        CoUnt
```

2. Select *dAtA_b* by pressing the T key.

```
          MODE
        dAtA_b
```

3. Select delete one (*dEL OnE*) by pressing the T key.

```
          MODE
        dEL OnE
```

4. The display will read Scan (*ScAn*) indicating to scan the NDC code that will be erased. At any time scan the NDC code.

```
          MODE
        ScAn
```

5. After scanning the code, the scale will display Found (ᖴᴑⳒ𝗇ᑯ) if this is an NDC code previously entered. Select yes (ᴵᴱ5) by pressing the T key to proceed with deleting the NDC code.

6. The scale will delete the selected NDC code and will display done (ᑯᴑ𝗇ᴱ) to confirm.
